

SMS BUILDER 3.3.5 Release Notes

2019-03-12 - Gershwin Marks - [Comments \(0\)](#) - [BUILDER Release Notes](#)

BUILDER 3.3.5

- Feature: Login page can now display messages via an RSS subscription
- Enhancement: More descriptive messages for scenario configuration errors have been added
- Enhancement: Search bar now available to Master Planners
- Enhancement: Inspection Supervisors can now perform Rapid Inspections
- Enhancement: The self-service password reset feature now supports an alternate email for authentication purposes
- Enhancement: Work Planners can now create and run scenarios
- Fix: Deleting the last section in a component now removes the associated performance record so rollups produce accurate indices
- Fix: BUILDER no longer errors when browser window is resized to only a few pixels
- Fix: Section details can again be viewed when a standard has not been set
