SMS BUILDER 3.6.8.1 Release Notes

2025-02-28 - Brandon Athey - [Comments \(0\)](#) - [BUILDER Release Notes](#)

Release Date 02/28/2025

Updates to CERL hosted sites will be scheduled with individual customer leads. Self-hosted customers and licensing partners can receive installers on or after the release date.

BUG FIXES:

- Updated the import process to account for Section “Year Installed” date changes within BRED.
- Updated a configuration value misspelling for the word “False” in the InventorySearchBar script.

DATA FIX:

In conjunction with the Bug Fix for the import process, we are running a database update to fix all Initial Inspections to

correspond with their respective Section Install Date. This may cause changes to a Section’s Remaining Service Life, Section CI, or both.

NEW FEATURE:

- Users can employ API calls to allow the importer to initiate Stored Procedures.

NEW FUNCTION:

- The Inventory Search bar can now be configured for use by all, regardless of user permissions.

DELETED FEATURE:

- The @updateDate parameter is no longer available for Stored Procedures.
