What do I do if I can't find a building?

Paul Paisley - 2020-11-17 - [Comments \(0\)](#) - [BUILDER](#)

Question:

What do I do if I can't find a building?

Answer:

Your BUILDER instance's inventory can contain buildings/facilities underneath Sites and Complexes. If you are unable to find a building then below are a couple of options that can be taken :

A) If your BUILDER instance contains Custom Reports, then you can run the 'Final 01 - Building Summary' report for your Organization, Site or Complex. This report will provide a list of buildings/facilities and their locations within BUILDER where at least one COMPONENT SECTION has been entered.

The screenshot shows the BUILDER software interface. At the top, there are buttons for 'Save', 'Comment', and 'Reports'. Below these are input fields for 'Number' (containing 'AO') and 'Name'. The 'Reports' dropdown menu is open, and the 'Custom' option is highlighted with a red box. Below the input fields are tabs for 'General Info.', 'Contact Info.', and 'Attributes'. The main content area is divided into 'Index Data' and 'Reference Settings'. The 'Index Data' section contains a table with the following data:

Metric	Value
CI	99
FI	100
PI	100
FCI	100

The 'Reference Settings' section contains several dropdown menus: 'Cost Book' (ABC3), 'Inflation Book' (Reference), 'Service Life Book' (Reference), 'Policy Sequence' (FY-2015 Sequence), 'Prioritization Scheme' (POM-2015 Priority), 'CII Set' (Reference), 'FCI Goal' (Select a FCI Goal), and 'Cost Modifier Library' (Walters Test). A 'Calculated Data' section at the top right shows 'PRV: \$7,294,894,218,080'.

B) You send an email to the BUILDER SMS Support Helpdesk at SMSSupport@erdc.dren.mil and provide as much of the following information as possible to assist with the investigation.

The SMS Support Helpdesk will use this information to try and locate the buildings/facilities, and then will respond to the query with the findings:

- 1) The BUILDER instance/URL where the buildings/facilities are not able to be found
- 2) The Site where the buildings/facilities are being searched
- 3) The 'Building No' value(s) for the buildings/facilities from BUILDER
- 4) The Building Name
- 5) The Area
- 6) The 'Alternate ID' (also known as RPUID) value(s) for the buildings/facilities from BUILDER
