BUILDER SMS BUILDER Remote Entry Database (BRED) CoN Extension Update 04.30.2024

2024-04-30 - Brandon Athey - [Comments \(0\)](#) - [General](#)

BUILDER SMS BUILDER Remote Entry Database (BRED) CoN Extension Update 04.30.2024

Description:

The BUILDER Remote Entry Database (BRED) application utilized with the BUILDER Sustainment Management System (BUILDER SMS) is currently covered within the ATO for the current work environment.

The ATO is in the process of being extended for an additional 6 months as we work to get the environment to meet the RMF 2.0 continuous monitoring standards for the remainder of the application's lifecycle.

Upon completion of the ATO extension, the BRED application will be included in the ATO and available for use as we continue to provide support for it in the current BUILDER SMS environment.

The POC for this action is Arthur White, Jr., Operations Manager, CEI-S, SMS-TCX, arthur.white@usace.army.mil, 910.988.2347.

Please refer to the following documentation for additional information: [BRED_Extension_2024.pdf](#).

Any questions related to the BRED CoN Update can be directed to the [SMS Helpdesk](#).
