SMS BUILDER 3.3.1 Release Notes

2019-03-12 - Gershwin Marks - Comments (0) - BUILDER Release Notes

BUILDER 3.3.1

- Enhancement: User accounts no longer have a uniqueness requirement for users' first and last names; e.g., there can now be two users named   "John Smith", but their usernames must still be unique.
- Fix: Global rollup now correctly computes Site and Organization level FCIs.
- Fix: Facility quantity fields using non-area units of measure now retain proper units during save and subsequent display.
- Fix: Scenarios no longer erroneously generate identical work items in consecutive years.

ROOFER 3.3.1

- Fix: Work Items may now be generated at the Site and Complex levels.
- Fix: Work Plan and MR&R (Maintenance, Rehabilitation, and Repair) reports now generate correctly.
