System Requirements for BUILDER installation

Paul Paisley - 2019-04-03 - Comments (0) - Installation and Server Administration

Enterprise Configuration Requirements:

Operating System: Windows Server 2008 R2 x64-bit
Software: SQL Server 2008 Express or SQL Server 2008 R2 64-bit
Hard drive space requirements: 400MB per Million Square Foot of Managed Inventory

Processor Recommended: 2.0 GHz or faster, 64-bit, 4+ Core Xeon
Minimum Memory: 8GB RAM

Application Server:
Operating System: Windows Server 2008 R2 64-bit
Software: Internet Information Service 7.5
Hard drive space requirements: 4GB + desired imagery storage
Processor Recommended: 2.0 GHz or faster, 64-bit, 4+ Core Xeon
Minimum Memory: 8GB RAM + 50MB per concurrent user

Single Server Configuration Requirements:
Operating System: Windows Server 2008 R2 x64-bit
Software: SQL Server 2008 Express or SQL Server 2008 R2 64-bit, Internet Information Service 7.5

PowerShell 3.0 or later

Hard drive space requirements: 4GB + desired imagery storage 400MB per Million Square Foot of Managed Inventory

Processor Recommended: 2.0 GHz or faster, 64bit, 4+ Core Xeon

Minimum Memory: 8GB RAM + 50MB per concurrent user

Standalone/Desktop Configuration Requirements:
Operating System: Windows 7 Professional 64-bit Edition or Ultimate 64-bit Edition
Software: SQL Server 2008 Express or SQL Server 2008 R2, Internet Information Service 7.5
Hard drive space requirements: 4GB + desired imagery storage 400MB per Million Square Foot of Managed Inventory

Processor Recommended: 2.0 GHz or faster, 64-bit, 4+cores
Minimum Memory: 8GB RAM with an aditional 50 MB per concurrent user
