Was There a Change to Scenarios in BUILDER 3.6.x?

Daniel Marcuccilli - 2021-11-09 - Comments (0) - Frequently Asked Questions

Question:

Was there a change to Scenarios in BUILDER 3.6.x?

Answer:

In previous BUILDER versions there were two versions of the Scenarios module offered ('Management' and 'New Management'). The 'Management' version of the Scenarios module relied on the Silverlight framework that is now deprecated. In BUILDER version 3.6.1 and newer there is only one version of the Scenarios module titled 'Management' which is the same as 'New Management' in older BUILDER versions.

Note:

Microsoft Edge, Mozilla Firefox, or Google Chrome will need to be used when accessing the Scenarios module in BUILDER versions 3.6.1 or newer as Internet Explorer will no longer work properly with this module.
