Which BUILDER/BRED version should I use?

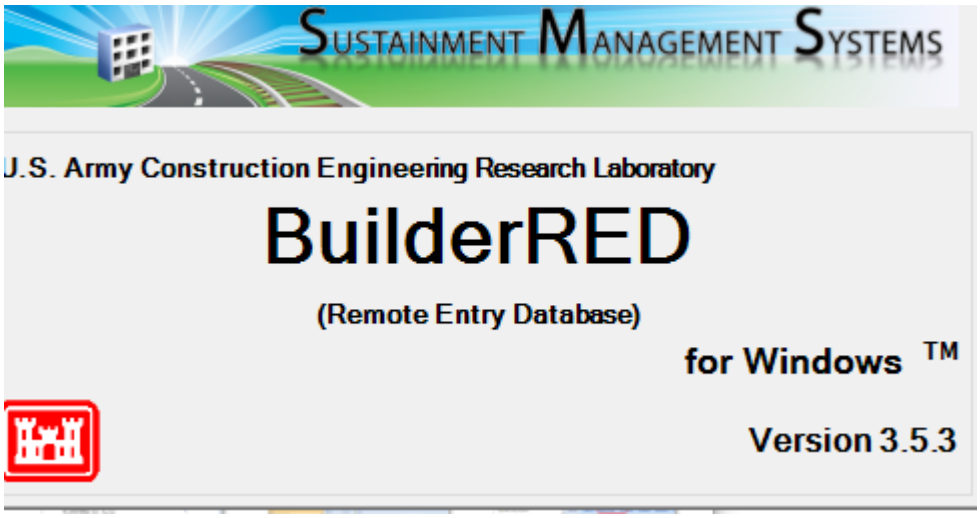

Paul Paisley - 2020-08-31 - Comments (0) - BUILDER Remote Entry Database (BRED)

Question:

Which BUILDER/BRED version should I use?

Answer:

Always use the most updated version available unless you require an older version of BRED for an older instance of BUILDER. See the link to the downloads, below. If your BUILDER instance is on version 3.5 or later, you will need to use the 3.5 version of BRED. Before installing the 3.5 BRED version, make sure to completely uninstall any previous versions of BRED.

BRED Downloads:

https://support.sms.erdc.dren.mil/downloads/bred

Please note that the BRED installer is a .exe file so certain permissions on your machine might be needed to install this software. Please reach out to your local IT office for assistance installing the application when you encounter this issue.
