BUILDER Summit Fall 2018

2018-10-29 - Gershwin Marks - [Comments \(0\)](#) - [General](#)

The Fall 2018 BUILDER Summit was hosted at the National Academy of Sciences Keck Center in Washington, DC on October 16th and 17th, 2018. The two-day event provided updates on SMS/BUILDER software development efforts, various other topics of interest for the SMS/BUILDER user community, and for the first time participant-led breakout sessions. These nine different breakout sessions allowed BUILDER stakeholders and users to come together and discuss implementation lessons learned, challenges and proposed solutions with one another. This event's record level of attendance included attendees from across the federal government as well as private sector entities assisting these federal agencies with implementation and adoption.

The slides presented at the BUILDER Summit are provided below as a PDF download.

Check this News feed as well as <https://www.buildersummit.com> for more information on upcoming meetings.

The BUILDER Summit convenes as a function of the OSD Sustainment Management System Configuration Support Panel's BUILDER Working Committee.
