E-SMS Sandbox 1.10.628 - 1.10.631 Release Notes

2026-02-03 - Brandon Athey - Comments (0) - E-SMS Release Notes

Release Date: 02/03/2026

E-SMS Version 1.10.628

Bug Fixes

Administration

- The Announcement Editor now features a “Create Announcement” tooltip for the “+” button and a “Delete Announcement” tooltip for the trash can button.

Assess

- When working with Workspaces, navigating from the main Workspaces page now returns users to the previous tab they accessed instead of the “Assets” tab.
- Adding inspection samples now requires users to create unique sample location names within the same Assessment record.
- When users edit items at the Assess > Workspaces > General (Tab) > Work Items (Tab) site path, the “Activity Type” field now updates accordingly.
- Users can no longer create a Workspace without completing the required fields.
- Clicking “Continue to Assessment” now navigates to the Assessment Edit page for Workspaces as expected.
- Clicking “Continue to Assessment” now navigates to the Assessment Details page when an Assessment is created.

Documents

- Duplicate documents no longer appear on the Documents “Search” page.
- Asset Association notifications are no longer duplicated when they are added to the “Documents” page.

Home

- The “Recently Visited” section of the Home page no longer shows pages multiple times if the user visits the page on multiple occasions.
- The “Install Field App” link is now available from the “User Settings” menu.

Inventory

- The Reference Books and Funding tabs now appear on the Inventory pages only for users with the appropriate permissions.
- The “Select Columns” button no longer appears greyed out after a user selects or deselects fields on a “Search” page.

Reference Books

- Users can now view which Reference Book is being inherited from an Organization even if they do not have permission to view the parent Organization.
- The “Value” field no longer defaults to “NaN” when new cost modifiers are created for Reference Books.
- “Cost Modifier Value” and “Times Assigned” filters now behave as expected for Cost Books.

Work

- The “Invalid Number” tooltip now appears when non-numerical values are entered when creating or editing a Work Analysis policy.

Feature Updates & Improvements

Inventory

- Inventory “Search” pages now include filters related to PRV and Component data and display them at the top of the page.

E-SMS Version 1.10.629

Bug Fixes

Assess

- Deleting Assessments from a Component no longer results in the Assessment data appearing at the Asset level.

Work

- Invalid values no longer can be saved to Work Analysis policies.

Feature Updates & Improvements

Administration

- The Connected Servers Editor’s “Save” button is now the disk icon at the top of the Connected Servers Detail page.

Work

- The “Status” field under Project > Details > Edit Details is now asterisked to indicate a required field.

E-SMS Version 1.10.630

Bug Fixes

Assess

- Creating and saving an Assessment now redirects users to the “View” mode instead of “Edit” mode.
- Workspace Components now execute a rollup to calculate CI and RV scores like non-Workspace Components.

Catalog

- Clicking “Save” in the “Specifications,” “Custom Attributes,” or “References” tabs under the Inventory Catalog now remains on the tab the user just accessed.

Organization

- Entering invalid Organizational GUIDs in the URL path now redirects users to the Home page.

E-SMS Version 1.10.631

Bug Fixes

Assess

- Workspaces with distress assessments can now be deleted.

Catalog

- Error messages now appear when there are issues deleting assessment templates.

Home

- Capitalized words on the Home page’s “Recently Visited” section stay capitalized when users return to Home from another page.

Inventory

- Filtering or clearing component filters no longer prevents additional components from loading.
- Separate direct condition rating templates are now available for assets and components.
- Cost calculations now update when component cost multipliers are edited.
- Inflation cost books now sync to the current organization when a rollup is performed at the site or asset levels.

Permissions

- Users with Inventory Create, Inventory Update, or Inventory Delete permissions can now add

component details.

Reference Books

- Organization-level cost modifier lists are now ordered similarly at parent and child levels.

Search

- “Select Items” buttons now appear when filters on the Group and Workspaces Search pages are selected.

Work

- Selecting “Delete Standard” now deletes the specific work standard chosen by the user.

Feature Updates & Improvements

Assess

- Metric types now appear on all Assessment Details, and the “Score” label is now used for all metric types.

- Assessment Search pages now feature an “Average Component Condition by UNIFORMAT L2” table (previously called “Average Condition Rating by Asset Type”).

Home

- A tutorial mode is now available to guide users through essential E-SMS features.

Inventory

- Component Search pages now let users select whether a component is parent-level or child-level.

Field App

E-SMS Version 1.10.628

Bug Fixes

Home

- The Field App can now deploy builds for macOS platforms in addition to Android, iOS, and Windows platforms.

Inventory

- Component data now saves as expected after the Component has been edited.

Feature Updates & Improvements

Assess

- Incoming assessment images are now accepted after syncing in Workspaces and are then assigned to the correct assessment instances or assessment answers. Support for existing images will continue so assessment images are not absorbed into managed objects.

- “Create Component” forms now default to “Active” when users choose to add a new Component.

E-SMS Version 1.10.629

Bug Fixes

Work

- Workspaces now have an option for users to select “No Color” in the “Color Code” field.

E-SMS Version 1.10.630

Feature Updates & Improvements

Home

- Users can now select different environment options when the Field App is first launched. Available environments depend on roles, and may include “Default/Public,” “Field Demo,” “Test,” and “Local.”

E-SMS Version 1.10.631

Bug Fixes

Inventory

- Blank rows in the Field App’s Component Search tables now stay the default color scheme when users assign color coding to other table rows.

Feature Updates & Improvements

Assess

- Assessment images now upload and sync in the Field App.

- Assessment images can now be captured, added, and viewed in the Field App.

- Assessment images taken in the Field App now upsync to the web application.

- The Field App’s Component Search page now includes “Location” information in the “Section Details” list.
