E-SMS Sandbox 1.10.632 - 1.10.634 Release Notes

2026-03-03 - Brandon Athey - Comments (0) - E-SMS Release Notes

Release Date: 03/03/2026

E-SMS Version 1.10.632

Bug Fixes

Assess

- Creating a new workspace and adding an existing asset no longer causes search errors.
- Adding assets to a workspace by site now filters out read-only assets.

Inventory

- When a list of components has a filter applied to it, the list now resets when the filter is cleared and allows all entries to load.
- After opening an Inventory Search page and then selecting a “Select…Type” page, users can now click the “Select All” checkbox to unselect all choices. Filtering unselected items ensures they do not appear on the list.

Reference Books

- After creating a new reference book, the full list of available reference books appears; the new reference can be automatically selected.
- In “Reference Books” > “Cost Modifiers,” the former “Create Modifier” tooltip is now called “Create Cost Modifier.”

Feature Updates & Improvements

Assess

- A filterable, searchable “Metric Type” column is now available on the “Assessments Search,” “Component Assessments,” and “Asset Assessments” pages.
- When creating an assessment, the “Assessment Template” dropdown displays templates associated with the inventory item’s category code.

Home

- Entries in “Frequently Visited” and “Recently Visited” now persist in the Edge browser following a user logging out and logging back in. Deleted pages are no longer displayed.
- In the side navigation’s Domain selector, the “Apply Selected Domains” button is now sticky.

Inventory

- “Component Details” are now called “Section Details” as they were originally called in BUILDER. They can be found under a component detail page’s “Custom Attributes.”

Workspaces

- The Asset Selector for workspaces now features a Facility (FAC) Code filter and the option to filter by multiple fields at once.

E-SMS Version 1.10.633

Bug Fixes

Assess

- The Assessment map now loads faster and without errors.
- Workspace users may now be either User or Approver, but not both.
- In a workspace, the ‘Status’ column filter now allows multiselect.
- Images now upload successfully for components in a workspace.

Documents

- Unsupported image file formats can no longer be uploaded to documents.

Home

- The “See browser console for more information” error has been replaced by more detailed, situation-specific error messages.
- Notifications are now dismissible.

Work

- Sites are now an available Work Item scope for sustaining organizations.

Feature Updates & Improvements

Home

- A “Clear Filter” button is now available for all filters.
- The notification count in the top navigation no longer includes seen messages.

Inventory

- Sustaining organizations can now view sustained sites in Inventory > Site.

Work

- Users are now notified explicitly when work items are copied to work plans.

E-SMS Version 1.10.634

- No new release notes were required for this version of E-SMS.

E-SMS Version 1.10.632

Field App

Bug Fixes

Assess

- Syncing no longer overwrites changes made to asset assessments in the Field App.

Home

- The “Select User” feature now filters user input when adding Field App users to organization, site, or workspace roles.

Feature Updates & Improvements

Home

- The Field App now has a Data Reset button to clear all local data.

Inventory

- “Component Details” are now called “Section Details” in the Field App.

E-SMS Version 1.10.633

Field App

Bug Fixes

Assess

- Users will now receive a notice that new assessment scores will be updated after syncing in the Field App.

- Assessments deleted in the Field App are now deleted in the Web App following a sync.

Home

- When the Field App is in “Light Mode,” the “Revisit” and “Completed” status checkboxes are now visible when selected.

Inventory

- The “Asset Number” and “MDI” fields now populate on the Asset page after a sync from the Field App.
- Deleting a component in the Field App and syncing to the Web App no longer results in a “500 error.”
- When the Asset Number is edited in the Web App and synced, the Field App now displays the updated Asset Number.

Feature Updates & Improvements

Assess

- When downsyncing in the Field App, image downloads are now optional via a toggle switch in the Application Settings.
- The workspace list now automatically populates when users log into the Field App for the first time.
- Users can now select the “Direct Condition Rating” button from the Quick Access Menu on any Component Detail page in the Field Application.

Inventory

- When creating a new component in the Field App, the Operational Status now defaults to “Active.”

E-SMS Version 1.10.634

Field App

- No new release notes were required for this version of the E-SMS Field App.
