E-SMS Sandbox 1.10.642 Release Notes

2026-06-02 - Brandon Athey - Comments (0) - E-SMS Release Notes

Release Date: 06/02/2026

E-SMS Version 1.10.642

Bug Fixes

Assess

- A redundant “Workspace Status” column has been removed from the Workspace Search page.

Inventory

- The “Asset Search” page now loads when the Fuels domain is the only domain selected.
- The “Select Organization” page no longer loads infinitely when users expand dropdowns.
- Sustaining users with organization-level permissions can now select Sites and Sustained Sites on the Organization Detail page without error messages appearing.

Work

- The Work dropdown is no longer visible to users without Administrator or Work Planner permissions.
- Work Item costs now update when the Work Activity Type is changed from “Replace” to another type.
- Organization-level policies, standards, and profiles are now visible for child organizations and sites to Organization-level Work Planners, Organization Curators, and Organization Administrators.

Feature Updates & Improvements

Assess

- A “Download Workspaces” button lets users download Workspace data in spreadsheets.

Inventory

- Aggregated PRVs are now visible on Organization Detail pages.

E-SMS Version 1.10.642

Field App

Bug Fixes

Assess

- Surface tablet users can now see and access all menus and functions when the Field App view is set to “Large.”
- “Failed to Load Data” errors no longer appear after editing component section details in the Field App or Web App.
- The Field App no longer freezes after users add photos to Direct Rating Assessments.

Assess & Inventory

- Surface tablet users can now view, select, and edit component Direct Condition Rating forms.

Inventory

- Users can now scroll through component or asset pages when hovering the mouse over empty lists in the Field App.
- Users can now change Specification, Classification, and Component data for new, childless components, assessments, or work items in the Field App.
- Tooltips now display when editing a component with child objects.
- After creating an asset or component, the Field App now lists the current “Construction Year” instead of the previous year.
