E-SMS Version 1.10.618

Bug Fixes

Assess

- “Add Distress” and “Edit Distress” popups for assessments now feature consistent styling.
- Workspace assessments now create without throwing faulty errors.

Inventory

- Rollup performance has been made consistent across organizations, sites, and assets.
- The “Permissions” tab now displays as expected under “Inventory ˃ Organization.”

Work

- Work item RPUIDs are now designated as “Read-Only.”
- Repair costs are now capped at the replace cost value in Work Analysis.
- Cost modifiers – including Area Cost Factors – now apply as expected with Work Analysis profiles.

E-SMS Version 1.10.619

Bug Fixes

Assess

- A component’s “Condition Index” value for the current year now resets to 100 if the component was installed in the same year as the assessment.
- Assessment dates now cannot predate component or asset installation dates, which was allow in previous versions.
- Assessments now display the full four-digit years.

Catalog

- Adding a new category code to an assessment template now leads to “Select Catcode” or “Select Binding” buttons instead of a “Select Asset” button.
- The “Select Asset Type” function now appears as expected on catalog pages.

Home

- Mislabeled locations in Frequently Visited and Recently Visited widgets on the Home page now display the correct location name.
- The “Last Login” date on the “User Settings Hover Menu” now shows the last login as expected instead

of the “Current Login.”

Inventory

- “Associated Organizations” and “Associated Sites” are now called “Sustained Organizations” and “Sustained Sites” on inventory menus.
- The “Select an Operation Status” dropdown is now revised as “Select an Operational Status” on the “Create Asset” and “Edit Asset” popups.
- Users with Inventory Create/Update/Delete permissions can now add components as expected.

Projects

- Projects no longer allow work items for multiple sites.

Reference Books

- The “Edit Reference Book” tooltip now appears as expected on the “Service Life” and “Inflation” pages.
- Adder entries now display as monetary values on cost modifiers.
- A “Value” field is now featured on the “Add/Edit” fields for cost modifiers.

Work

- Users may now deselect all domains selected in scope in the at the Work Analysis “Profile” tab.
- Empty objective rules no longer crash “Work Analysis” profile runs.

Feature Updates & Improvements

Inventory

- Text informing users when there are “No applicable cost modifiers” now matches the style of other pages on the site.
- The “Delete Group” confirmation popup now includes specific language about what will be deleted.
- The “Close” button is now listed as a “Cancel” button on warning popups for “Delete Item” screens.

Reference Books

- Cost book entries now include a $ sign to display for dollar amounts.

Work

- The “Comments” popup under Work > Projects now resembles other popups found on the site.
