# E-SMS Sandbox 1.10.625 - 1.10.627 Release Notes

2026-01-07 - Brandon Athey - Comments (0) - E-SMS Release Notes

Release Date: 01/07/2026

## E-SMS Version 1.10.625

### Bug Fixes

Inventory

- New roles now save permanently when users navigate to the Inventory > Sites > Permissions Tab path.

Work

- Prioritization metric scores are now constrained to values between 0 to 100.

### Field App

### Bug Fixes

Inventory

- Inventory images now sync successfully to the Field App after a workspace is created.
- Deleting an assessment no longer causes the Field App to freeze.
- The “Location” column in the Field App’s “Component” tables no longer populates with semicolons.

### Feature Updates & Improvements

Home

- The Field App now features a Data Reset button so users may remove old data.

Workspaces

- Assessment images can now be viewed in the Field App by creating a workspace and adding images to an assessment.

## E-SMS Version 1.10.626

### Bug Fixes

Inventory

- Inventory items with semicolons can now be included and save correctly.

Workspaces

- Assets can now be successfully added to newly created workspaces.

### Feature Updates & Improvements

Inventory

- Character counts are now increased to 200 characters for the “Model,” “Warranty Company,” and “Warranty Company 2” fields in component details.

Workspaces

- Workspaces are now available to use across all E-SMS sandboxes.

### Field App

### Feature Updates & Improvements

Inventory

- Users may configure Automated Component Naming templates to automatically fill in the “Name” field in “Component Create” forms.

## E-SMS Version 1.10.627

### Bug Fixes

Inventory

- Time zones no longer affect displayed construction dates.

- Component and asset rollups now exclude select components to prevent cost duplication. This applies to components marked as anything except “Active” and to assets marked as “Replaced,” “Disposed,” “Closed Outgranted,” or “To Be Acquired.”

- Alternate IDs are no longer required when creating a component.

Reference Books

- The “Name” field now appears with an asterisk to indicate it is mandatory when new reference books are created. The “Create” button is now greyed out when the “Name” field is blank.

- The “Current Cost” now displays the correct value on “Cost Detail” pages.

Work

- Work items are no longer generated against non-active components or assets.

Workspaces

- Assessments can now be deleted from components in a workspace.

## Field App

## Bug Fixes

Inventory

- When users create a component in the Field App, the Unit of Measure now populates automatically after a specification is chosen.
- Creating new components in the Field App no longer results in sync errors.

Workspaces

- Syncing to a deleted workspace from the Field App no longer removes other workspaces.

## Feature Updates & Improvements

Inventory

- Components now feature “Completed” and “Revisit” flags for assessors and the same “New/Modified/Unmodified” icons as workspaces.
- Color-coded rows based on status are now available, and users have the option to filter component searches by status or color.
- Color-coded section details and assessments are now available.
- Component-related comments can now be added to the component’s “Comment” field instead of the section detail’s “Comment” field.
