Sustainment Management System Support

SMS BUILDER 3.6.6 Release Notes

2022-09-07 - Paul Paisley - Comments (0) - BUILDER Release Notes

Release Date: September 7, 2022

Updates to CERL hosted sites will be scheduled with individual customer leads. Self-hosted customers and licensing partners can receive installers on or after the release date.

BUG Fixes:

- Users can now access BUILDER Scenarios and find an accurate representation of the current progress of the scenario running. Users will not have to refresh their page to show the accurate current progress.
- Users will now receive error messages that provide information necessary for corrective actions.
- Users requesting facilities by a site will find the BUILDER API returning one building, opposed to duplicate buildings.
- Users will find all features presented by the Configuration tool and Impact Configuration tool are functional.

NEW FEATURES :

- The Bureau of Overseas Building Operations (OBO) users can now access BUILDER though the OKTA single sign-on (SSO) service. This provides access under OBO's existing security without need to create/monitor additional passwords or other login requirements.
- Certain building-level field values have been locked for particular users. Restricting the editing of certain building level fields, will benefit the Real Property data integrity and systems connection integrity.
- Users performing configuration on a BUILDER system are able to generate configuration files from the configuration utility for BUILDER or the Impact Service.
